Subject: Fwd: DRAFT White Paper re: Status of Lake Conestee Dam
Attachments: HRI-WP210525-LCD.pdf

Hi Alayna

Attached is a piece I'm ready to release as a 'primer' / white paper / backgrounder to elected officials, and other key stakeholders.

Everything in it is public record, but the synthesis is mine.

Please feel free to share it with your EPA colleagues.

I'll be sending it to our SCDHEC friends over the next couple of days.

Also, links below to some nice public interest pieces on the plight of our national dam infrastructure.

Of course LCD, is not a flooding threat like many other dams, but a bomb of contamination ready to explode.

Which, per my meeting w/ your R4Administrator and Franklin Hill on 04 Dec 2018, is why you have the LC Site in your house now.

I am available to help in any way, any time.

Very best regards,
Dave

Dave Hargett, Ph.D.
